

## Cala Homes in Falkirk chooses Style for moveable walls

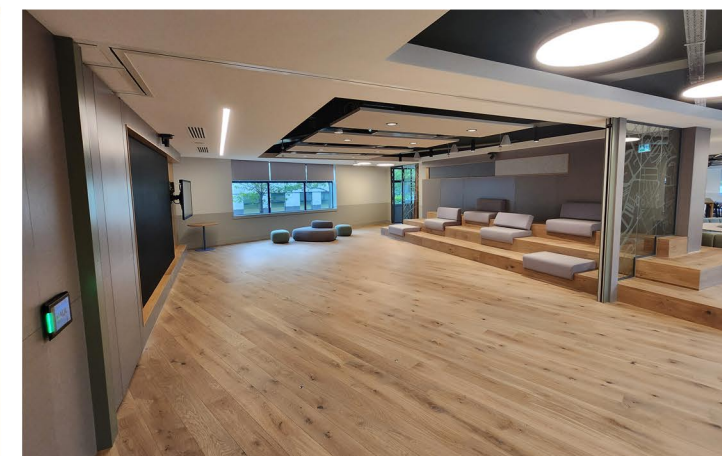

At Cala's offices in Falkirk, Style installed a Dorma Huppe Variflex moveable wall with semi-automatic operation and an impressive 52dB acoustic rating.

To complement the clean, modern interior design of the meeting room the moveable wall panels were finished in cement grey and, thanks to the ease and lightweight manoeuvre, the room can be quickly divided to cater for different requirements every day.

"This is a really stylish meeting area," said Angela McGowan, sales director for Style Scotland. "At one end there is relaxed, comfortable seating area with a large, flat screen TV, and the other is a more formal meeting area.

"The moveable wall divides the room into two, so that different types of meetings can take place whilst also having the option of opening up the entire space into a larger open plan room.

"By including a pass door, the moveable wall can remain in place for extended periods of time, and the high end acoustic rating ensures that meetings and events can take place without disturbing one another."
