

ECO-FRIENDLY MOVEABLE WALL AT KPMG'S 'GREEN' BUILDING

STYLE

Leading the way in environmental efficiency, KPMG's Ignition Centre, in the heart of Canary Wharf, aims to maximise the use of a large meeting area with the installation of two Dorma Hüppe Variflex moveable walls. Available from sole UK distributor and market-leading partitioning expert, Style, the Variflex system is certified with an EPO (Environmental Product Declaration) in accordance with ISO 14025 and EN 15804, reflecting KPMG's commitment to sustainability. Style worked with MCM Architects and Mace Interiors to deliver a contemporary solution that would bring greater flexibility to the main meeting room. The individual elements of the two Variflex systems can be quickly manoeuvred into place, efficiently dividing the space into smaller working areas - which is particularly relevant given current social distancing requirements. Semi-automatic operation ensures the substantial rubber seals expand to exactly the required level to create an impressive 55dB acoustic divide, allowing employees to work undisturbed, at all times.
