

STYLE GETS LUCKY WITH 13TH FIS GOLD AWARD

STYLE

Style has won the coveted Contractor's Gold award yet again at this year's FIS awards. It is the 13th time that Style has won the top prize and, with five silver accolades under its belt, Style has won an incredible 18 times during its 24-year history. The award was presented at a gala dinner at the Royal Lancaster Hotel, London. Julian Sargent, Style's Group Managing Director, picked up the award for creating flexible office space at Reckitt Benckiser in Slough. To deliver room flexibility at Reckitt, Style installed a combination of Skyfold, vertically-rising, fully-automatic, acoustic, moveable walls and a Dorma Hüppe Variflex semi-automatic moveable wall, all with impressive 59 dB acoustic ratings. "This is a tribute to everyone who works at Style and their incredible professionalism and dedication," said Julian. "What makes this award even more special is the Skyfold we installed at Reckitt Benckiser was our 300th in the UK market, which shows how demand is soaring for this world-class operable wall."

STYLE LAUNCHES NEW BALCONY AND TERRACE GLASS SLIDING WALLS

STYLE

Style has launched a new glass sliding wall solution for balconies and terraces (BSW). Transforming a balcony into a functional space, glass panels are used to enclose the area, creating a barrier against weather and noise without impeding the view. On fine days, the upper section of the glass panels can be neatly folded and stacked to one side, allowing people to sit out and enjoy the sunshine. For terrace rooms that open straight out into a garden or external seating area, Style's new glass sliding wall allows the boundary between the two spaces to be easily removed on sunny days whilst successfully combining weather protection with uninterrupted outside views during inclement weather. With a discrete guidance track that can be fitted flush to the floor, the BSW system creates a truly streamlined aesthetic. Making for a welcoming environment, even when a terrace room or balcony is entirely enclosed by glass panels, air still circulates internally thanks to tiny, 3mm gaps between that provide continuous ventilation.
