Global engineering consultancy, WSP, recently relocated 850 Manchester-based staff to new offices situated in the prestigious, No8 First Street building. The refurbished office space focuses on the wellbeing of employees, creating relaxing spaces where they can unwind and spend time with colleagues. Contributing to this positive lifestyle environment, Style installed two DORMA Varitrans glass moveable walls, effectively separating breakout areas and creating either two smaller rooms or one large open plan space. In the breakout areas the glass DORMA Varitrans moveable walls feature a forest manifestation graphic, adding a sense of escapism to the area, whilst still providing functional privacy. style-partitions.co.uk
