

→ **STYLE PARTITIONS**

With floor space at a premium, partitioning expert Style strives to deliver solutions that minimise space needed to create an effective room divide. For example, the fully-automatic Skyfold Zenith is stored out of sight in the ceiling cavity. At the touch of a button it slides down as almost entirely flat panels, allowing a room to be quickly divided without even moving furniture. The sliding Dorma Variflex ML moveable wall is another outstanding system that features panels just 88mm thick. Clever use of modern acoustic materials ensures excellent sound insulation of up to Rw 58dB and when not required, the panels can be tucked into the smallest possible space.
