

STYLE SERVICE TEAM SAVES MOVEABLE WALL

Style has the contract to provide scheduled servicing of the large number of partitioning walls installed at a major university. In a recent visit, the service engineers noticed that the carriers fitted on a wall, not

originally supplied and fitted by Style, were cracked. This was causing issues with the moveable wall's operation, and Style's technicians advised that the carriers needed to be replaced to avoid further damage in the long term. "This is an excellent example of why it's so important to have your moveable, folding or partitioning walls routinely serviced," said Hannah Thorneycroft, Service Manager for Style North. "Without replacing the carriers, the operation of this wall would have become increasingly difficult, which often results in operators using excessive force to open and close it, leading to even worse damage further down the line. By spotting the problem early, we were able to replace the carriers and return the moveable wall to its original smooth operation, saving a considerable amount of time and money." Style first had to source the specific carriers that worked with this type of moveable wall and replaced them on site.
