

## **Style partitions help transform new London office**

Partitioning expert, Style, was contracted to deliver flexible space for the showcase meeting and training areas of Fidelity International's new London office, installing four fully automatic Skyfold moveable walls, finished in a stunning Kvadrat Floyd fabric. Housed discreetly in the ceiling cavity, the Skyfold units take up zero floor space when not required, descending gracefully at the touch of the button to quickly sub-divide an area. With impressive 59dB Rw acoustic integrity, meetings and events can run concurrently, entirely undisturbed on either side of the wall. [www.style-partitions.co.uk](http://www.style-partitions.co.uk)
