

A healthy investment from Style

Partitioning expert Style recently installed two manually operated Dorma Hüppe Variflex ML100 moveable wall systems to Saffron Health medical centre, allowing a meeting room facility to be quickly divided into three small rooms, one large and one small room or a single open plan space. This capital investment will deliver a good return in the long run, saving money by accommodating several meetings at one time, cutting hire fees for external facilities as well as staff travel time.
