

Premier League chooses Style for its moveable walls

At the Premier League office, a Dorma Huppe Variflex glazed moveable wall was installed to run the length of the room, with two solid Variflex moveable walls stemming off it to provide up to three smaller meeting rooms.

Alternatively, one very large meeting area can be created, there can be one large and one small meeting room, or the floor can be fully opened up into a very large space.

The glazed moveable wall system offers a 52dB acoustic rating, and each solid wall a 57dB rating, ensuring concurrent meetings can take place undisturbed from each other, and the breakout area.

With RAL9004 frames on the glass and a fabric finish on the solid panels, the moveable walls are also a chic and stylish enhancement to the interior design of the room.

The walls all come with semi-automatic operation, which means the acoustic seals are applied to the correct pressure each time and thanks to these walls being light and effortless to manoeuvre, the room configuration can be changed quickly for different events.
