

Partitioning expert Style has worked closely with contractor Osborne and Associated Architects to assist with and advise on the design of numerous moveable wall systems at new Emily Wilding Davison building, at Royal Holloway University.

Demonstrating the full breadth of Style's portfolio, the final arrangement involved a 50dB Rw DORMA glass wall in the events seminar room, a DORMA Variflex system in the events space, a 56dB Rw acoustic DORMA moveable wall in the PC training rooms, a 46dB Rw folding wall in a clinic room, and a 56dB Rw DORMA moveable wall in the meeting rooms.

The demand for flexible space on this state-of-the-art project was extensive, while the specification was also far from the norm. In one room, the university wished to include hanging rails on the partitioning panels, allowing artwork to be displayed. There was also a need for additional acoustic protection and visual privacy in the reception area, as and when required.
