

Hotel extension with flexible space and stunning views

Tewkesbury Park

The Tewkesbury Park Hotel boasts unrivalled views across the Gloucestershire countryside, with 9 historic suites and superb hospitality facilities.

Working with architects, Childs and Silzmann and contractor, Building Supplies, Style was specified to provide the best space management possible in the hotel's newly built extension.

Two DORMA Moveo semi-automatic moveable walls were chosen as the best solution, enabling the extension's conferencing room to be divided into one large room and one smaller room, three small rooms or turned into a complete open plan space.

Offering lab tested 55dB Rw acoustic integrity, a stunning dark walnut wooden veneer finish and DORMA's Comfortronic seals, these operable walls helped maximise the hotel's revenue opportunities by enabling them to cater for varying sizes of events, often concurrently, with outstanding acoustic integrity and the ability to reconfigure the room in minutes.

"The Tewkesbury Park Hotel is a first choice location for weddings, conferences, corporate meetings and parties," said Julian Sargent, Style's group managing director.

"As a result, flexibility is key as the room needs to be changed quickly and easily to suit the next function.

"The final solution gave the hotel a great deal of flexibility and these DORMA moveable walls couldn't be easier to manoeuvre into position thanks to their ease of handling and semi-automatic operation."

Style is the market leader, and exclusive UK partner to DORMA and Skyfold, offering a wide range of moveable walls for every requirement and budget.
