

W EDINBURGH

Edinburgh hotel chooses Style for moveable walls

At the W Hotel in Edinburgh, Style was specified to create flexible space in the hotel's main function space.

To achieve this, Style installed 3 Dorma Huppe Variflex moveable walls, each with semi-automatic operation.

With an impressive 55dB acoustic rating on all of the moveable walls, they create a superb acoustic barrier when in place, which means multiple events can be hosted without disturbing one another.

Over and above this, Style added a bespoke Autex cube panel finish which further enhances the acoustic performance of the rooms.

The triple installation means the area can be sub-divided into 3 smaller rooms, one large and one small, or the entire space can be opened up for larger events.

"Hosting events is obviously a huge part of a hotel's business," said Angela McGowan, sales director at Style Scotland, "which is why it's so important to have room flexibility and be able to change the use of the space quickly and easily."
