

East Lothian learning campus chooses moveable wall

At Wallyford Learning Campus, East Lothian, Style was specified to enable the main assembly and drama hall to be divided into two separate rooms as and when required, offering the campus greater flexibility to adapt the use of this central area.

To achieve this, Style installed a Dorma Huppe Variflex ComfortDrive moveable wall with fully automatic operation.

At the push of a button, the moveable wall glides into place, dividing the room into two and forming an impressive 57dB acoustic barrier. This means a noisy class on one side won't disturb more quiet teaching on the other.

“This is a large space with a high ceiling,” said Angela McGowan, sales director for Style Scotland. “As a result, the panels are 4.6 metres tall which is why the fully automated operation is an advantage, as it would be more difficult to manoeuvre these larger panels by hand.”

“By having the moveable wall in place, it opens up new options for Wallyford Learning Campus in terms of how they use the space – changing it from two rooms into one very large, open plan area in a matter of minutes.”
